
NEW INSTRUCTOR ORIENTATION

GA Healthcare Training & Consulting

Building Skills. Changing Lives. Advancing Healthcare.

Presented by Dr. Yolaine Nozile, Founder & CEO

Welcome to the team

Your teaching helps build Georgia's healthcare workforce

- Your classroom, lab, and clinical teaching directly shape patient care.
- Every learner deserves consistent instruction and a fair assessment.
- We will give you the tools and support to teach with confidence.

Orientation purpose

By the end of orientation

- Explain our mission, values, and services
- Locate course materials and use the learning system
- Apply assessment and documentation standards

Before your first assignment

- Understand your role and reporting pathway
- Know the limits of your instructional authority
- Recognize issues that require leadership support

Who we are

Serving learners and healthcare organizations since 2015

- 01** **AHA certification and continuing education**
- 02** Workforce and career entry training
- 03** Nursing education and NCLEX support
- 04** Consulting, program development, and regulatory guidance

The learners we serve

Learners arrive with different experience, responsibilities, and confidence

- New healthcare students who have never worn scrubs
- Experienced clinicians renewing required certifications
- Career changers investing in a new professional future
- Adult learners balancing work, family, transportation, and test anxiety

Our values in practice

COMPASSION

Teach the person in front of you. Respond to barriers without lowering competency standards.

EXCELLENCE

Prepare thoroughly, teach accurately, and assess every learner against the same standard.

INTEGRITY

Document what happened, report what you observed, and follow approved requirements.

Support available to you

Teaching resources

- Approved curriculum and lesson plans
- Handouts, skills checklists, and assessments
- Learning system access for assigned courses

Program support

- Instructor onboarding packet and handbook
- Guidance for attendance and reporting
- Access to program leadership when concerns arise

Instructor expectations

PREPARED

Review the lesson plan and set up the learning environment before students arrive.

PRESENT

Start on time, stay engaged, and model the professional behavior expected of learners.

ACCURATE

Complete attendance, evaluations, and skills documentation on the same day.

PROFESSIONAL

Represent GAHCTC well in every classroom, lab, and clinical setting.

Course preparation

- Review objectives, timing, activities, and assessment requirements.
- Confirm room access, equipment, supplies, and technology before class.
- Use the approved curriculum. Ask before changing course sequence or content.
- Prepare for learner accommodations or needs communicated by leadership.

Assessment and competency standards

80%

**Written assessment passing
threshold**

100%

Required skills competency

Provide clear feedback and follow the approved remediation process when a learner does not meet the standard.

Documentation requirements

Complete records on the day the activity occurs

- Attendance and punctuality
- Written assessments and skills validation
- Learner evaluations and remediation
- Incidents, injuries, and unusual events
- Clinical or site concerns reported through the proper pathway

Professional conduct across settings

Classroom and skills lab

- Protect learner privacy and maintain respectful communication
- Use equipment safely and keep the lab ready for instruction
- Maintain clear professional boundaries

Clinical sites

- Follow the facility's rules and assigned scope
- Protect patient confidentiality at all times
- Escalate safety, conduct, and placement concerns promptly

Supporting a struggling learner

A learner's difficult moment can become a turning point

- 1 Observe and describe the specific gap
- 2 Give clear, respectful feedback
- 3 Use the approved practice or remediation process
- 4 **Document the outcome and notify leadership when required**

When to contact program leadership

- A student concern falls outside your assigned role or authority.
- Safety, confidentiality, misconduct, or clinical placement concerns arise.
- Course materials, equipment, staffing, or schedules may affect instruction.
- A learner needs support beyond the approved remediation process.
- You are uncertain about a policy, regulation, or documentation requirement.

First teaching assignment checklist

Course readiness

- Assignment and reporting contact confirmed
- Curriculum and lesson plan reviewed
- Learning system access tested
- Room, lab, supplies, and equipment confirmed

Documentation readiness

- Roster and attendance forms ready
- Assessment and skills documents ready
- Site-specific expectations reviewed
- Questions escalated before the course begins

Welcome to GA Healthcare Training & Consulting

The curriculum is the tool

The outcome is a competent, confident healthcare worker

Thank you for choosing to teach with us. We are glad you are here.
