# A Message from Dr. Nozile

---

*Welcome to GA Healthcare Training & Consulting.*

We are excited you have chosen to begin your healthcare journey with us. Congratulations on taking this important step toward a rewarding profession dedicated to caring for others.

At GA Healthcare Training & Consulting, healthcare is more than a job — it is a calling rooted in compassion, dignity, professionalism, and excellence.

As a Certified Nursing Assistant, you will support residents, patients, families, and the healthcare team through kindness, safety, and skilled care.

**Welcome to the profession of caring.**

# Program Overview

*Preparing safe, competent, and compassionate nurse aides.*

The GAHCTC Nurse Aide Training Program prepares students to deliver basic nursing care under the supervision of a licensed nurse in long-term care and other healthcare settings.

## Safe Care

Infection prevention, safety, emergency response, and resident protection.

## Competent Skills

Vital signs, personal care, mobility, nutrition, elimination, and documentation.

## Compassionate Service

Residents' rights, dignity, communication, dementia care, and end-of-life support.

**Upon successful completion, graduates are prepared to register for the Georgia nurse aide competency examination.**

# Blended Learning Track: 98 Approved Hours

*Online theory is self-paced; skills lab and clinical are completed in person.*

## 40 Online Theory Hours

Self-paced modules, readings, videos, quizzes, and chapter tests.

## 34 In-Person Skills Lab Hours

Hands-on practice, demonstration, return demonstration, and skills check-offs.

## 24 Clinical Hours

Supervised resident care in a long-term care facility.

**All 98 approved hours must be completed before the Certificate of Completion is issued.**

# Admission & Clinical Readiness Requirements

*Documents and checkpoints must be completed on time.*

## Admission Requirements

- Government-issued photo ID
- High school graduation or equivalent
- Criminal background check
- Negative TB screening: PPD or QuantiFERON
- Student professional liability insurance

## Before Resident Contact / Clinical

- Modules 2–5 completed before any direct contact with residents
- All online modules completed with passing scores before clinical rotation
- Background clearance, TB documentation, and liability insurance on file before the first clinical day
- Skills check-offs completed before performing those skills with residents

# Required Materials & Online Readiness

*Come prepared for online learning, skills lab, and clinical.*

## Required Materials

- Hartman's Nursing Assistant Care: The Basics, 6th edition
- Manual blood pressure cuff
- Stethoscope
- Watch with a second hand
- Program paperwork and clinical documents

## Online Learning Readiness

- Reliable internet access
- Computer or tablet recommended for tests
- Personal email address for platform login
- Ability to follow a weekly self-paced study schedule
- Use instructor support by email and scheduled office hours

# Course Modules: Foundations

*Modules 1–7 build professional, communication, safety, and observation skills.*

**1 Role & Responsibilities of the Nurse Aide**

**2 Communication & Interpersonal Skills**

**3 Infection Prevention & Control**

**4 Safety & Emergency Procedures**

**5 Residents' Rights, Dignity & Independence**

**6 Abuse, Neglect & Misappropriation**

**7 The Human Body, Aging & Common Conditions**

**Key early focus: communication, infection control, safety, residents' rights, and mandatory reporting.**

# Course Modules: Skills, Clinical Readiness & Transition

*Modules 8–15 focus on hands-on care, documentation, and state exam preparation.*

**8** Vital Signs, Measurements & Observation

**9** Personal Care & Skin Integrity

**10** Mobility, Positioning & Restorative Care

**11** Nutrition & Hydration

**12** Elimination

**13** Dementia, Cognitive Impairment & Mental Health

**14** Special Care Situations & End-of-Life Care

**15** Documentation, Clinical Readiness & Professional Transition

**Clinical readiness includes documentation practice, mock skills exam, résumé workshop, and interview preparation.**

# Skills Lab: How You Will Learn Each Skill

*Practice is structured, coached, and verified before clinical.*

**1**

## **Explain**

Purpose, safety concerns, and resident-centered beginning and ending steps.

**2**

## **Demonstrate**

Instructor performs the full skill, then breaks it down step by step.

**3**

## **Practice**

Students practice in pairs using approved skills checklists.

**4**

## **Coach**

Instructor corrects technique and reinforces critical steps.

**5**

## **Verify**

Student performs independently for check-off.

**A student must be checked off in the lab before performing that skill with a resident.**

# Clinical Experience

*Supervised resident care in a long-term care facility.*

## Clinical Day

7:00 AM

Students are encouraged to arrive by 6:45 AM for preconference.

|                    |                                                                   |
|--------------------|-------------------------------------------------------------------|
| Preconference      | Review assignments, resident safety needs, and learning goals.    |
| Direct Supervision | Instructor supervises resident care and guides safe practice.     |
| Scope of Practice  | Students perform only skills checked off in the lab.              |
| Post-conference    | Debrief learning, documentation, professionalism, and next steps. |

# Evaluation & Program Completion Requirements

*Students must meet written, skills, clinical, and attendance requirements.*

**80%**

Online module quizzes, chapter tests, and the in-person final test.

**100%**

Required skills check-offs, including critical steps.

**Satisfactory**

Clinical performance evaluation and safe, professional care.

**98 Hours**

All approved theory, skills lab, and clinical hours completed.

**Students who meet all requirements receive a Certificate of Completion and become eligible to register for the state competency exam.**

# Professional Standards

*Your conduct reflects your readiness for healthcare practice.*

## Expected Behaviors

- Arrive on time and prepared
- Treat instructors, classmates, residents, and staff with respect
- Maintain confidentiality and HIPAA compliance
- Use the chain of command to report concerns
- Practice safe care and ask for help when unsure

## Clinical Site Rules

- No cell phones during resident care
- No photographs of residents
- Follow facility policies and instructor direction
- Report hazards, incidents, and resident changes promptly
- Maintain professional appearance and accountability

# Student Support & Success Plan

*Support is built into the blended learning model.*

GAHCTC supports students through frequent feedback, skills coaching, office hours, and early remediation when needed.

**Instructor Support**

Email and scheduled office hours for questions about online content.

**Practice & Coaching**

Open-lab practice, peer coaching, and instructor-guided review.

**Knowledge Checks**

Low-stakes checks help identify learning gaps early.

**Remediation**

Review, assigned practice, and retesting before students advance.

**Ask questions early. Practice often. Stay organized.**

# Next Steps

---

- Complete required documents and online modules on schedule.
- Attend all skills lab and clinical sessions prepared and on time.
- Meet written, skills, clinical, and professional requirements.
- Receive Certificate of Completion and register for the Georgia state competency exam.

**Thank you — and welcome to the profession of caring.**

**GA Healthcare Training & Consulting**

Building Skills. Changing Lives. Advancing Healthcare.

## Our Commitment

We provide quality instruction, hands-on training, supportive learning experiences, professional mentorship, and preparation for healthcare success.

---

***Excellent CNAs change lives every day through kindness, competence, dignity, and safe care.***
