NURSE AIDE TRAINING PROGRAM — BLENDED LEARNING TRACK

Chapter Test Schedule & TalentLMS Gating Plan

Hartman, Nursing Assistant Care: The Basics, 6th Edition · 15 Modules · 10 Chapter Tests · August 2026

Students take a publisher chapter test after each textbook chapter. Because the fifteen GAHCTC modules are organized by topic and the textbook is organized by chapter, the two do not align one to one — six of the ten chapters are taught across more than one module, and four modules teach content from more than one chapter. This document sets the release point for each chapter test.

Governing Rule

A chapter test is released only after the last module that teaches any part of that chapter. Releasing a test earlier examines students on material they have not yet been taught, which produces failures that reflect sequencing rather than learning.

SECTION 1: CHAPTER-TO-MODULE MAP

Where each chapter is taught, and the module after which its test is released.

Ch	Chapter Title	Pages	Taught in Modules	Release Test
1	The Nursing Assistant in Long-Term Care	1–20	1, 5, 6	After Module 6
2	Foundations of Resident Care	21–62	2, 3, 4	After Module 4
3	Understanding Residents	63–82	5, 11, 14	After Module 14
4	Body Systems and Related Conditions	83–114	7	After Module 7
5	Confusion, Dementia, and Alzheimer's Disease	115–127	11	After Module 11
6	Personal Care Skills	128–174	5, 9, 12, 13	After Module 13
7	Basic Nursing Skills	175–216	8	After Module 8
8	Nutrition and Hydration	217–234	10	After Module 10
9	Rehabilitation and Restorative Care	235–248	12	After Module 12
10	Caring for Yourself	249–257	1, 2	After Module 2

Chapter 10 is fully covered by Modules 1 and 2 and is therefore tested early in the program rather than at the end, even though it is the final chapter of the textbook.

SECTION 2: RELEASE SEQUENCE BY MODULE

The order in which tests unlock as a student progresses. Five modules carry no chapter test because they teach only part of a chapter; those modules are assessed by their module quiz alone.

After	Release	Rationale
Module 1	—	Module quiz only. Teaches Ch 1 (role, team, chain of command, professionalism) and Ch 10 (certification, registry, career).
Module 2	Chapter 10	Ch 10 is now fully taught across Modules 1–2. Release the Ch 10 test here rather than at the end of the program.
Module 3	—	Module quiz only. Teaches the infection control portion of Ch 2 (pp. 46–62).
Module 4	Chapter 2	Ch 2 complete: communication (Mod 2, pp. 21–30), infection control (Mod 3, pp. 46–62), safety and emergencies (Mod 4, pp. 31–45).
Module 5	—	Module quiz only. Teaches part of Ch 1 (rights, ethics) and part of Ch 6 (p. 128), plus restraints from Ch 7.
Module 6	Chapter 1	Ch 1 complete across Modules 1, 5, and 6. Falls inside the pre-contact block — gate skills lab eligibility on passing.
Module 7	Chapter 4	Ch 4 complete, including the reproductive system lesson added to close the prior gap.
Module 8	Chapter 7	Ch 7 complete after adding admission/transfer/discharge, resident unit and bedmaking, and catheters/oxygen/IV to Module 8.
Module 9	—	Module quiz only. Teaches the largest portion of Ch 6 but not all of it.
Module 10	Chapter 8	Ch 8 is taught entirely within Module 10. Clean one-to-one match.
Module 11	Chapter 5	Ch 5 complete, including the creative therapies lesson added to close the prior gap.

After	Release	Rationale
Module 12	Chapter 9	Ch 9 complete after adding prosthetic devices and bladder/bowel retraining to Module 12.
Module 13	Chapter 6	Ch 6 complete across Modules 5, 9, 12, and 13. Last chapter test tied to a skills-heavy module.
Module 14	Chapter 3	Ch 3 complete across Modules 5, 11, and 14, including growth and development and developmental disabilities.
Module 15	—	No chapter test. Module quiz, then the proctored in-person comprehensive final examination.

SECTION 3: COVERAGE GAPS CLOSED

A review of every chapter learning objective against the module lessons identified thirteen textbook objectives with no corresponding module content. Students would have been tested on material never taught. Ten new lessons were written to close these gaps; all thirteen objectives are now covered.

Textbook Objective	Content	Now Taught In
Ch 1, p. 3	Medicare and Medicaid	Module 1, Lesson 8 — How Long-Term Care Is Paid For & the MDS
Ch 1, p. 20	Minimum Data Set (MDS)	Module 1, Lesson 8
Ch 3, p. 68	The need for activity	Module 11, Lesson 10 — The Need for Activity & Creative Therapies
Ch 3, p. 69	Stages of human growth and development	Module 11, Lesson 9 — Growth, Development & Developmental Disabilities
Ch 3, p. 72	Developmental disabilities	Module 11, Lesson 9
Ch 4, p. 109	Reproductive system and related conditions	Module 7, Lesson 11 — Reproductive System
Ch 5, p. 126	Creative therapies in dementia care	Module 11, Lesson 10
Ch 7, p. 175	Admission, transfer, and discharge	Module 8, Lesson 8 — Admission, Transfer & Discharge
Ch 7, p. 195	Restraints and the restraint-free environment	Module 5, Lesson 8 — Restraints & the Restraint-Free Environment
Ch 7, p. 203	Catheters, oxygen therapy, and IV therapy	Module 8, Lesson 10 — Catheters, Oxygen & IV Therapy
Ch 7, p. 209	Sleep and bedmaking	Module 8, Lesson 9 — The Resident Unit, Sleep & Bedmaking
Ch 9, p. 241	Prosthetic devices	Module 12, Lesson 9 — Prosthetic & Orthotic Devices
Ch 9, p. 247	Bladder and bowel retraining	Module 12, Lesson 10 — Bladder & Bowel Retraining

Four of These Are Also Core Curriculum Requirements

Restraints (Part VII.G), bedmaking (Part III.I), prosthetic devices (Part VI.F), and bladder and bowel retraining (Part VI.E) appear in the GAHCTC Policy & Procedure Manual as required curriculum. Their absence from the modules was a Georgia DCH compliance gap independent of testing. Adding these lessons resolves both issues.

SECTION 4: TALENTLMS CONFIGURATION

4.1 Assessment Inventory

Assessment	Count	Standard
Knowledge checks (formative, in-module)	Varies	Ungraded, unlimited attempts, must be attempted before module completion
Module quizzes	15	80% minimum, one retake
Chapter tests (publisher)	10	80% minimum, one retake after documented remediation
Comprehensive final examination	1	80% minimum, proctored in person at the GAHCTC facility
Total graded assessments	26	Per Section 10.2, Policy & Procedure Manual

4.2 Sequencing Rules

- Modules unlock sequentially. A module does not open until the preceding module's quiz is passed at 80%.
- A chapter test unlocks only after the final module covering that chapter is marked complete.
- Chapter tests for Chapters 1 and 2 fall within the 16-hour pre-contact block. Both must be passed — not merely completed — before skills laboratory check-in eligibility is granted.
- Chapter test scores are recorded separately from module quiz scores so that theory mastery can be reported by textbook chapter for DCH audit.
- A student who does not meet 80% completes documented remediation with the instructor before the single permitted retake.
- The comprehensive final examination is never made available online, under any circumstance.

4.3 Pre-Contact Gate

Modules 1 through 6 deliver the 16 hours of Part I pre-contact training. Before a student may check in for any skills laboratory session involving resident-care simulation or direct resident contact, TalentLMS must show:

- Modules 1–6 complete, with all six module quizzes passed at 80%.
- Chapter 1 test passed at 80%.
- Chapter 2 test passed at 80%.
- Chapter 10 test passed at 80% (released after Module 2).
- Sixteen hours of recorded time-on-task across the Part I content.

The Program Director verifies these five conditions and authorizes skills laboratory check-in. Verification is documented in the student record and is exportable from TalentLMS for audit.

4.4 Instructor Monitoring

- Review TalentLMS progress reports at least weekly against the published cohort pacing guide.
- Contact any student more than one module behind pace and place them on a written catch-up plan.
- Review chapter test item analysis each cohort; items missed by more than 40% of students indicate a teaching gap, not a student gap.

- Compare chapter test performance against in-person final examination and skills check-off results to confirm online assessment predicts in-person competence, per Section 16 of the Policy & Procedure Manual.
