1. Course Overview

1.1 Course Description

The GAHCTC Nurse Aide Training Program prepares students to deliver safe, competent, and compassionate basic nursing care to residents in long-term care and other healthcare settings under the supervision of a licensed nurse. The course integrates self-paced online theory, skills laboratory practice, and supervised clinical experience in a long-term care facility. Graduates are prepared to sit for the Georgia nurse aide competency examination (NNAAP, administered by Credentia) and, upon passing, to be placed on the Georgia Nurse Aide Registry maintained by Alliant Health Solutions.

1.2 Target Audience and Admission

The course is designed for adult learners entering healthcare, including career changers, pre-nursing students, and current healthcare support workers. Admission requires a valid government-issued photo ID; a criminal background check; proof of high school graduation or equivalent; and a negative TB screening (PPD or QuantiFERON). Background clearance, TB documentation, and student professional liability insurance must be on file before the first clinical day.

1.3 Required Textbook

Fuzy, J. *Hartman's Nursing Assistant Care: The Basics* (6th ed.). Hartman Publishing. ISBN 978-1-60425-141-8. Chapter and page cross-references are maintained in the Skills Lab & Clinical Lesson Plans (Appendices A and B).

1.4 Delivery Formats and Program Hours

Track	Theory	Skills Lab	Clinical	Total
Blended learning	40 hrs online (self-paced)	34 hrs in person	24 hrs	98 hours

In the blended learning track, all theory is completed online at the student's own pace. Skills laboratory and clinical instruction are held in person at GAHCTC and the clinical site. Online theory for Modules 2 through 5 must be completed before any direct contact with residents, and all online modules must be completed with passing scores before the clinical rotation begins. All 98 approved hours must be completed before a Certificate of Completion is issued.

1.4a Online Learning Requirements

- Reliable internet access and a computer or tablet (a phone alone is not recommended for tests)
- A personal email address for the online learning platform login
- Ability to manage self-paced study; the program recommends a weekly study schedule
- Online time is tracked by the platform and counts toward the 40 approved theory hours

- Instructor support is available by email and scheduled office hours for questions on online content

1.5 Regulatory Alignment

Content is aligned with federal nurse aide training requirements (42 CFR §483.152) and the Georgia DCH Federal & State Core Curriculum. Consistent with federal requirements, content on communication and interpersonal skills, infection control, safety and emergency procedures (including abdominal thrusts), promoting residents' independence, and residents' rights (Modules 2–5) is completed before any direct contact with residents, whether studied online or in person.

2. Course Objectives

Upon successful completion of the Nurse Aide Training Program, the student will be able to:

No.	Program-Level Objective
PO1	Describe the role, responsibilities, legal scope, and ethical obligations of the nurse aide as a member of the healthcare team in Georgia.
PO2	Communicate effectively and respectfully with residents, families, and team members, adapting communication for sensory, cognitive, language, and cultural needs.
PO3	Apply standard and transmission-based precautions, including hand hygiene and correct use of personal protective equipment (PPE), to prevent the spread of infection.
PO4	Implement safety measures and emergency procedures that prevent falls, injuries, fires, and choking, and respond appropriately when emergencies occur.
PO5	Uphold residents' rights, privacy, dignity, and independence in every care interaction, consistent with OBRA and federal/state regulations.
PO6	Recognize the signs of abuse, neglect, exploitation, and misappropriation of resident property, and report concerns immediately through the proper chain of command.
PO7	Accurately measure, record, and report vital signs, height, weight, intake and output, and changes in resident condition.
PO8	Perform personal care, mobility, nutrition, and elimination skills safely and competently according to the approved skills checklist.
PO9	Provide person-centered care to residents with dementia, cognitive impairment, mental health conditions, and developmental disabilities.
PO10	Provide compassionate care during admission, transfer, discharge, rehabilitation, and end of life.
PO11	Document and report observations objectively, accurately, and in a timely manner.
PO12	Demonstrate professional behavior and readiness for the state competency exam, Georgia Nurse Aide Registry placement, and entry-level employment.

Objective design note: Objectives are written in measurable, behavioral terms using Bloom's Taxonomy (describe, identify, apply, demonstrate, perform). Each module objective maps to one or more program objectives, shown in the module headers in Section 3 and in the alignment matrix in Section 6.

3. Course Content

3.1 Content Summary

Module	Title	Program Objectives
1	Role and Responsibilities of the Nurse Aide	PO1, PO11, PO12
2	Communication and Interpersonal Skills	PO2, PO11
3	Infection Prevention and Control	PO3
4	Safety and Emergency Procedures	PO4
5	Residents' Rights, Dignity, and Independence	PO5
6	Abuse, Neglect, and Misappropriation of Resident Property	PO6
7	The Human Body, Aging, and Common Conditions	PO7, PO11
8	Vital Signs, Measurements, and Observation	PO7
9	Personal Care and Skin Integrity	PO5, PO8
10	Mobility, Positioning, and Restorative Care	PO4, PO8
11	Nutrition and Hydration	PO7, PO8
12	Elimination	PO3, PO8
13	Dementia, Cognitive Impairment, and Mental Health	PO2, PO9
14	Special Care Situations and End-of-Life Care	PO5, PO10
15	Documentation, Clinical Readiness, and Professional Transition	PO1, PO11, PO12

3.2 Module Detail

Each module below lists its learning objectives, content outline, instructional methods, evaluation strategies, and associated skills and handouts.

Module 1: Role and Responsibilities of the Nurse Aide

Program objectives addressed: PO1, PO11, PO12

Learning objectives — the student will be able to:

- 1.1 Identify the healthcare settings in which nurse aides work, with emphasis on long-term care.
- 1.2 Describe the members of the interdisciplinary team and use the chain of command to report concerns.
- 1.3 Distinguish tasks within and outside the Georgia nurse aide scope of practice.

- 1.4 Explain the legal and ethical principles that guide nurse aide practice (OBRA '87, HIPAA, negligence, confidentiality).
- 1.5 Demonstrate professional behaviors, including accountability, time management, and appearance.

Content Outline	• Healthcare settings: long-term care, subacute, assisted living, home health, hospital • The care team, the care plan, and the nurse aide's role in the nursing process • Chain of command and appropriate delegation • Georgia nurse aide scope of practice and the Nurse Aide Registry • Legal and ethical standards: OBRA '87, HIPAA, negligence, malpractice, assault, battery, false imprisonment • Professionalism, work ethic, personal wellness, and stress management
Instructional Methods	• Online (self-paced): narrated lessons, assigned textbook readings, videos, and embedded knowledge checks • In person (skills lab): Scope-of-practice sorting activity ("Can I? / Should I? / Must I report?") • In person (skills lab): Case scenarios on ethical dilemmas • In person (skills lab): Think-pair-share on professional boundaries
Evaluation Strategies	• Online module quiz (80%) • Online chapter test(s) for related textbook chapters (80%) • Professional behavior observation (ongoing) • Final Test (in person, comprehensive)
Handouts	H/O Chain of Command; H/O Georgia CNA Scope of Practice

Module 2: Communication and Interpersonal Skills

Program objectives addressed: PO2, PO11

Learning objectives — the student will be able to:

- 2.1 Differentiate verbal and nonverbal communication and identify common barriers.
- 2.2 Apply techniques for communicating with residents who have hearing, vision, speech, or cognitive impairment.
- 2.3 Demonstrate culturally respectful communication with residents and families.
- 2.4 Distinguish objective and subjective observations and report them accurately.
- 2.5 Use basic medical terminology and approved abbreviations correctly.

Content Outline	• The communication process; verbal, nonverbal, and written communication • Barriers to communication and strategies to overcome them • Communication with residents with sensory impairment, aphasia, or confusion • Cultural humility, spirituality, and family dynamics • Observing and reporting: objective vs. subjective data; oral reports to the nurse • Medical terminology, abbreviations, and the 24-hour clock • Telephone etiquette, conflict resolution, and handling complaints
Instructional Methods	• Online (self-paced): narrated lessons, assigned textbook readings, videos, and embedded knowledge checks • In person (skills lab): Role-play with peer feedback • In person (skills lab): Communication barrier simulation (earplugs, blurred-vision goggles) • In person (skills lab): Terminology flash-card drills • In person (skills lab): Short video analysis of effective vs. ineffective communication
Evaluation Strategies	• Online module quiz (80%) • Online chapter test(s) for related textbook chapters (80%) • Role-play rubric • Terminology quiz • Final Test (in person, comprehensive)

Module 3: Infection Prevention and Control

Program objectives addressed: PO3

Learning objectives — the student will be able to:

- 3.1 Explain the chain of infection and how to break each link.
- 3.2 Apply standard precautions to the care of every resident.
- 3.3 Differentiate contact, droplet, and airborne transmission-based precautions.
- 3.4 Demonstrate hand hygiene and correct donning and doffing of PPE.
- 3.5 Describe OSHA bloodborne pathogen requirements and safe handling of sharps, linens, and spills.

Content Outline	• Microorganisms, the chain of infection, and signs of infection in older adults • Medical asepsis; handwashing vs. alcohol-based hand rub • Standard precautions and transmission-based precautions • PPE sequence: donning and doffing • Bloodborne pathogens (HBV, HCV, HIV), exposure control, and the hepatitis B vaccine • Multidrug-resistant organisms, C. diff, respiratory hygiene, and outbreak response • Cleaning, disinfection, linen handling, and biohazard waste
Instructional Methods	• Online (self-paced): narrated lessons, assigned textbook readings, videos, and embedded knowledge checks • In person (skills lab): Demonstration / return demonstration • In person (skills lab): Glo-Germ handwashing lab • In person (skills lab): Chain-of-infection concept map • In person (skills lab): Isolation-room scenario stations
Evaluation Strategies	• Online module quiz (80%) • Online chapter test(s) for related textbook chapters (80%) • Skills check-off: hand hygiene; donning/doffing gown and gloves (100%) • Final Test (in person, comprehensive)
Skills Taught	• Hand hygiene (handwashing) • Donning and removing PPE (gown and gloves)
Handouts	H/O Standard Precautions

Module 4: Safety and Emergency Procedures

Program objectives addressed: PO4

Learning objectives — the student will be able to:

- 4.1 Identify residents at risk for falls and implement fall-prevention measures.
- 4.2 Explain restraint regulations and demonstrate restraint alternatives.
- 4.3 Apply principles of body mechanics to protect residents and self.
- 4.4 Respond to fire using RACE and PASS.
- 4.5 Demonstrate the response to a conscious choking adult (abdominal thrusts).
- 4.6 Report incidents and hazards according to facility policy.

Content Outline	• Common accidents in long-term care: falls, burns, poisoning, choking, skin tears • Fall risk factors and prevention; call light and environment safety • Restraints: legal requirements, risks, and restraint-free alternatives • Body mechanics and ergonomic principles • Oxygen safety and fire safety (RACE / PASS) • Choking, fainting, seizures, and the nurse aide's role in emergencies • Disaster preparedness and incident reporting
Instructional Methods	• Online (self-paced): narrated lessons, assigned textbook readings, videos, and embedded knowledge checks • In person (skills lab): Hazard-hunt in the mock resident room • In person (skills lab): Demonstration / return demonstration • In person (skills lab): Emergency response drills • In person (skills lab): Case-based discussion of incident reports
Evaluation Strategies	• Online module quiz (80%) • Online chapter test(s) for related textbook chapters (80%) • Hazard identification worksheet • Emergency drill observation checklist • Final Test (in person, comprehensive)
Skills Taught	• Abdominal thrusts (conscious adult) • Proper body mechanics during all skills
Handouts	H/O Hazard Identification Worksheet

Module 5: Residents' Rights, Dignity, and Independence

Program objectives addressed: PO5

Learning objectives — the student will be able to:

- 5.1 List residents' rights under OBRA and explain how nurse aides protect them.
- 5.2 Provide privacy and confidentiality during all care.
- 5.3 Promote resident choice, self-care, and independence.
- 5.4 Describe psychosocial, cultural, and spiritual needs of residents.
- 5.5 Explain the role of the long-term care ombudsman and the grievance process.

Content Outline	• OBRA residents' rights: dignity, privacy, choice, personal possessions, freedom from restraint and abuse • Maslow's hierarchy and person-centered care • Promoting independence and self-care • Sexuality, intimacy, and privacy in long-term care • Family involvement, resident councils, grievances, and the ombudsman • Quality of life and the care environment
Instructional Methods	• Online (self-paced): narrated lessons, assigned textbook readings, videos, and embedded knowledge checks • In person (skills lab): Case scenarios ("Right or violation?") • In person (skills lab): Guided discussion • In person (skills lab): Reflective journaling on dignity
Evaluation Strategies	• Online module quiz (80%) • Online chapter test(s) for related textbook chapters (80%) • Scenario worksheet • Privacy steps verified on every skills check-off • Final Test (in person, comprehensive)
Skills Taught	• Privacy, identification, and communication steps embedded in all skills
Handouts	H/O OBRA Residents' Rights

Module 6: Abuse, Neglect, and Misappropriation of Resident Property

Program objectives addressed: PO6

Learning objectives — the student will be able to:

- 6.1 Define physical, sexual, verbal, emotional, and financial abuse, neglect, exploitation, and misappropriation.
- 6.2 Recognize physical and behavioral signs of abuse and neglect.
- 6.3 Describe the nurse aide's mandatory duty to report and the reporting process.
- 6.4 Explain the consequences of a substantiated finding on the Nurse Aide Registry.

Content Outline	• Types of abuse, neglect, exploitation, and misappropriation • Warning signs and risk factors • Mandatory reporting: immediate report to the nurse/supervisor and facility administrator per federal and state requirements • Protecting the residents while a report is investigated • Registry findings and consequences for employment eligibility • Workplace stress and preventing caregiver abuse
Instructional Methods	• Online (self-paced): narrated lessons, assigned textbook readings, videos, and embedded knowledge checks • In person (skills lab): Case studies • In person (skills lab): Video analysis • In person (skills lab): Small group "what would you report?" exercise
Evaluation Strategies	• Online module quiz (80%) • Online chapter test(s) for related textbook chapters (80%) • Case study responses • Final Test (in person, comprehensive)

Module 7: The Human Body, Aging, and Common Conditions

Program objectives addressed: PO7, PO11

Learning objectives — the student will be able to:

- 7.1 Describe the structure and function of major body systems.
- 7.2 Differentiate normal age-related changes from signs of illness.
- 7.3 Describe common chronic conditions in long-term care and related nurse aide care.
- 7.4 Identify changes in condition that must be reported to the nurse.

Content Outline	• Integumentary, musculoskeletal, nervous, sensory, cardiovascular, respiratory, urinary, gastrointestinal, endocrine, reproductive, and immune systems • Normal changes of aging by system • Common conditions: diabetes, CHF, COPD, stroke (CVA), arthritis, osteoporosis, Parkinson's disease, cancer • Signs and symptoms to observe and report
Instructional Methods	• Online (self-paced): narrated lessons, assigned textbook readings, videos, and embedded knowledge checks • In person (skills lab): Body-system matching games • In person (skills lab): Case-based "observe and report" exercises
Evaluation Strategies	• Online module quiz (80%) • Online chapter test(s) for related textbook chapters (80%) • Final Test (in person, comprehensive)

Module 8: Vital Signs, Measurements, and Observation

Program objectives addressed: PO7

Learning objectives — the student will be able to:

- 8.1 State normal ranges for temperature, pulse, respirations, and blood pressure in adults.
- 8.2 Accurately measure and record vital signs, height, and weight.
- 8.3 Assess and report pain using an approved pain scale.
- 8.4 Report abnormal findings promptly to the nurse.

Content Outline	• Temperature sites and equipment • Radial and apical pulse; respirations • Manual blood pressure measurement • Pain as the fifth vital sign; pain scales • Height and weight (standing, chair, bed scales) • Documenting and reporting abnormal values
Instructional Methods	• Online (self-paced): narrated lessons, assigned textbook readings, videos, and embedded knowledge checks • In person (skills lab): Demonstration / return demonstration • In person (skills lab): Partner practice with instructor verification • In person (skills lab): Blood pressure simulator / dual-head stethoscope practice
Evaluation Strategies	• Online module quiz (80%) • Online chapter test(s) for related textbook chapters (80%) • Skills check-off: pulse, respirations, manual BP, weight (100%) • Vital signs accuracy log • Final Test (in person, comprehensive)
Skills Taught	• Counts and records radial pulse • Counts and records respirations • Measures and records manual blood pressure • Measures and records weight of ambulatory resident
Handouts	H/O Vital Signs Reference Card

Module 9: Personal Care and Skin Integrity

Program objectives addressed: PO5, PO8

Learning objectives — the student will be able to:

- 9.1 Perform bathing, oral care, grooming, and dressing while promoting dignity and independence.
- 9.2 Perform perineal care using correct infection-control technique.
- 9.3 Identify residents at risk for pressure injuries using the Braden Scale and implement prevention measures.
- 9.4 Make occupied and unoccupied beds correctly.

Content Outline	• Bathing: complete and partial bed bath, shower, tub • Perineal care (female and male) • Oral care, denture care, and care of the unconscious resident's mouth • Grooming: hair, shaving, nail care (fingernails), dressing with an affected (weak) arm • Skin care, pressure injury stages, positioning, and the Braden Scale • Bedmaking: occupied and unoccupied
Instructional Methods	• Online (self-paced): narrated lessons, assigned textbook readings, videos, and embedded knowledge checks • In person (skills lab): Demonstration / return demonstration • In person (skills lab): Skills stations with checklists • In person (skills lab): Peer coaching • In person (skills lab): Instructor-guided practice on manikins
Evaluation Strategies	• Online module quiz (80%) • Online chapter test(s) for related textbook chapters (80%) • Skills check-offs (100%) • Braden Scale practice worksheet • Final Test (in person, comprehensive)
Skills Taught	• Hand and nail care • Mouth care / denture care • Perineal care (female) • Partial bed bath • Dresses resident with affected (weak) arm • Occupied and unoccupied bedmaking
Handouts	H/O Bedmaking Checklist; H/O Braden Scale

Module 10: Mobility, Positioning, and Restorative Care

Program objectives addressed: PO4, PO8

Learning objectives — the student will be able to:

- 10.1 Position residents safely and comfortably in bed and chair.
- 10.2 Transfer residents from bed to wheelchair using a gait/transfer belt.
- 10.3 Assist with ambulation using a gait belt, cane, or walker.
- 10.4 Perform passive range-of-motion exercises.
- 10.5 Describe restorative care principles and use of assistive devices.

Content Outline	• Positions: supine, lateral (side-lying), Fowler's, Sims', prone; moving up in bed • Transfers: bed to chair/wheelchair; mechanical lift awareness • Ambulation and use of assistive devices • Range-of-motion exercises (shoulder, knee, ankle) • Restorative and rehabilitative care; promoting independence • Prosthetics, orthotics, and anti-embolism stockings
Instructional Methods	• Online (self-paced): narrated lessons, assigned textbook readings, videos, and embedded knowledge checks • In person (skills lab): Demonstration / return demonstration • In person (skills lab): Role reversal (student as resident) • In person (skills lab): Skills lab rotation stations
Evaluation Strategies	• Online module quiz (80%) • Online chapter test(s) for related textbook chapters (80%) • Skills check-offs (100%) • Final Test (in person, comprehensive)
Skills Taught	• Positions on side • Transfers from bed to wheelchair using transfer belt • Assists to ambulate using transfer belt • Passive ROM: shoulder, knee and ankle • Applies knee-high elastic stocking

Module 11: Nutrition and Hydration

Program objectives addressed: PO7, PO8

Learning objectives — the student will be able to:

- 11.1 Describe basic nutrition principles and common therapeutic diets.
- 11.2 Assist and feed residents safely, using aspiration precautions.
- 11.3 Measure and record intake and output accurately.
- 11.4 Recognize and report signs of dehydration and unintended weight loss.

Content Outline	- Nutrients and MyPlate; nutritional needs of older adults - Therapeutic and modified diets; thickened liquids - Dysphagia and aspiration precautions - Mealtime assistance and dining dignity - Fluid balance, intake and output, fluid restrictions, and forcing fluids - Dehydration and malnutrition warning signs
Instructional Methods	- Online (self-paced): narrated lessons, assigned textbook readings, videos, and embedded knowledge checks - In person (skills lab): Demonstration / return demonstration - In person (skills lab): I&O calculation practice - In person (skills lab): Mock dining room lab
Evaluation Strategies	- Online module quiz (80%) - Online chapter test(s) for related textbook chapters (80%) - I&O calculation worksheet - Skills check-off: feeds resident; measures urinary output (100%) - Final Test (in person, comprehensive)
Skills Taught	- Feeds resident who cannot feed self - Measures and records urinary output

Module 12: Elimination

Program objectives addressed: PO3, PO8

Learning objectives — the student will be able to:

- 12.1 Assist residents with bedpan, urinal, and bedside commode.
- 12.2 Provide catheter care and care of the urinary drainage bag.
- 12.3 Collect urine and stool specimens using correct technique.
- 12.4 Provide incontinence care and support bowel and bladder retraining.
- 12.5 Observe and report abnormal urine and stool characteristics.

Content Outline	• Normal urinary and bowel elimination • Bedpan, fracture pan, urinal, and commode • Indwelling and external catheters; catheter-associated infection prevention • Specimen collection: routine, clean-catch, stool • Incontinence care and bowel/bladder retraining • Constipation, diarrhea, impaction, and ostomy basics
Instructional Methods	• Online (self-paced): narrated lessons, assigned textbook readings, videos, and embedded knowledge checks • In person (skills lab): Demonstration / return demonstration • In person (skills lab): Case-based bowel and bladder log review • In person (skills lab): Skills stations
Evaluation Strategies	• Online module quiz (80%) • Online chapter test(s) for related textbook chapters (80%) • Skills check-offs (100%) • Bladder/bowel log exercise • Final Test (in person, comprehensive)
Skills Taught	• Assists with use of bedpan • Provides catheter care (female) • Measures and records urinary output
Handouts	H/O Bladder/Bowel Log

Module 13: Dementia, Cognitive Impairment, and Mental Health

Program objectives addressed: PO2, PO9

Learning objectives — the student will be able to:

- 13.1 Describe the stages and common behaviors of dementia, including Alzheimer's disease.
- 13.2 Apply person-centered communication techniques such as validation and redirection.
- 13.3 Respond to challenging behaviors (wandering, agitation, sundowning) calmly and safely.
- 13.4 Describe common mental health conditions and developmental disabilities.
- 13.5 Recognize when to report behavior changes and safety risks to the nurse.

Content Outline	• Normal aging vs. delirium vs. dementia • Stages of Alzheimer's disease and related dementias • Communication techniques, validation, reminiscence, and redirection • Responding to behaviors; non-pharmacological approaches; de-escalation basics • Depression, anxiety, and other mental health conditions • Intellectual and developmental disabilities
Instructional Methods	• Online (self-paced): narrated lessons, assigned textbook readings, videos, and embedded knowledge checks • In person (skills lab): Guided video study • In person (skills lab): Role-play of behavior scenarios • In person (skills lab): Reflective discussion • In person (skills lab): Empathy-building activities
Evaluation Strategies	• Online module quiz (80%) • Online chapter test(s) for related textbook chapters (80%) • Video guide completion • Scenario role-play rubric • Final Test (in person, comprehensive)
Handouts	H/O Dementia Video Guide

Module 14: Special Care Situations and End-of-Life Care

Program objectives addressed: PO5, PO10

Learning objectives — the student will be able to:

- 14.1 Assist with admission, transfer, and discharge while reducing resident anxiety.
- 14.2 Promote rest, sleep, and comfort.
- 14.3 Describe the stages of grief and the nurse aide's role in hospice and palliative care.
- 14.4 Provide respectful postmortem care consistent with cultural and religious preferences.

Content Outline	• Admission, transfer, and discharge procedures; care of personal belongings • Rest, sleep, and comfort measures • Subacute and rehabilitation care • Death and dying: stages of grief, advance directives, DNR, hospice and palliative care • Signs of approaching death and postmortem care • Caregiver self-care and grief
Instructional Methods	• Online (self-paced): narrated lessons, assigned textbook readings, videos, and embedded knowledge checks • In person (skills lab): Guided discussion • In person (skills lab): Case studies • In person (skills lab): Demonstration of admission and postmortem procedures
Evaluation Strategies	• Online module quiz (80%) • Online chapter test(s) for related textbook chapters (80%) • Case study responses • Final Test (in person, comprehensive)
Skills Taught	• Admission, transfer, and discharge steps (lab practice)

Module 15: Documentation, Clinical Readiness, and Professional Transition

Program objectives addressed: PO1, PO11, PO12

Learning objectives — the student will be able to:

- 15.1 Document care accurately and legally in paper and electronic records.
- 15.2 Use the clinical observation and reporting checklist during clinical rotation.
- 15.3 Follow clinical site conduct and HIPAA requirements.
- 15.4 Describe the state competency exam process (Credentia) and Georgia Nurse Aide Registry placement and renewal.
- 15.5 Prepare a résumé and practice interview skills.

Content Outline	• Documentation principles: accurate, objective, timely; correcting errors; flow sheets and ADL records • Clinical rotation expectations: preconference, assignments, conduct, reporting • NNAAP written/oral and skills exam: registration, format, and test-day preparation • Georgia Nurse Aide Registry: access, placement, and renewal requirements • Job search, résumé, interviewing, and continued professional growth
Instructional Methods	• Online (self-paced): narrated lessons, assigned textbook readings, videos, and embedded knowledge checks • In person (skills lab): Documentation practice with sample flow sheets • In person (skills lab): Mock skills exam • In person (skills lab): Résumé workshop and mock interviews
Evaluation Strategies	• Online module quiz (80%) • Online chapter test(s) for related textbook chapters (80%) • Documentation exercise • Mock skills exam • Clinical performance evaluation • Final Test (in person, comprehensive)
Skills Taught	• Documentation of care and observations
Handouts	H/O Clinical Observation & Reporting Checklist; H/O Registry Access Guide; H/O Employment Resources

4. Instructional Methods

Instruction follows adult learning principles: learners bring life experience, learn best when content is immediately applicable, and need frequent practice with feedback. Each class session moves from explanation, to demonstration, to guided practice, to independent performance, to reflection. Methods are varied to accommodate different learning preferences, literacy levels, and prior healthcare experience.

Method	Description	Primary Application
Self-paced online lessons	Narrated lessons, assigned readings, and short videos completed on the student's own schedule, with embedded knowledge checks.	Theory content for all modules (40 online hours).
Demonstration / return demonstration	Instructor models the skill step by step; each student performs it back with coaching until independent.	All skills lab procedures (Modules 3, 4, 8–12).
Skills lab practice stations	Rotating stations with checklists, manikins, and peer partners.	Personal care, mobility, vital signs, elimination, nutrition.
Simulation and role-play	Realistic resident scenarios in the mock resident room, including communication and behavior situations.	Communication, dementia care, emergencies, residents' rights.
Case studies and scenario analysis	Small-group analysis of a resident situation followed by debrief.	Legal/ethical issues, abuse reporting, observation and reporting.
Audiovisual and video-guided learning	Short videos with structured viewing guides.	Dementia care, abuse recognition, skills refreshers.
Supervised clinical practice	Direct resident care in a long-term care facility under instructor supervision, with pre- and post-conference.	Week 4 clinical rotation; integration of all modules.
Reflection and debriefing	Guided reflection after lab, simulation, and clinical days.	Professional identity, communication, dignity, self-care.
Peer teaching and coaching	Students coach each other using skills checklists.	Skills lab; exam preparation.

4.1 Skills Lab Instruction Sequence

1. **Explain:** State the purpose of the skill, safety concerns, and the resident-centered beginning and ending steps.
2. **Demonstrate:** Instructor performs the full skill at normal speed, then again step by step.
3. **Practice:** Students practice in pairs using the skills checklist, alternating resident and aide roles.
4. **Coach:** Instructor circulates, corrects technique, and reinforces critical steps (hand hygiene, privacy, safety, communication).

5. **Verify:** Student performs the skill independently for check-off.

4.2 Clinical Instruction

Clinical days begin at 7:00 a.m., with students encouraged to arrive at 6:45 a.m. for preconference. Preconference reviews assignments, resident safety needs, and learning goals. The instructor supervises all resident care directly and debriefs students in post-conference. Students may perform only skills for which they have been checked off in the lab.

4.3 Supporting Diverse Learners

- Plain-language handouts and visual reference cards for key content
- Extra open-lab practice time and peer coaching for students needing more repetition
- Recorded demonstrations and online lessons that can be replayed for self-paced reinforcement
- Reasonable accommodations provided on request in accordance with program policy
- Frequent low-stakes knowledge checks so gaps are identified early

5. Evaluation Strategies

Evaluation is both formative (ongoing, to guide learning) and summative (to verify competency). Students must meet the written, skills, clinical, and attendance requirements to complete the program.

5.1 Formative Evaluation

- In-class knowledge checks, questioning, and polling
- Module quizzes and worksheets (e.g., hazard identification, I&O calculations, Braden Scale practice)
- Instructor observation and coaching during skills practice
- Role-play and simulation debriefs
- Online embedded knowledge checks with immediate feedback
- Instructor review of online progress reports to identify students who are falling behind

5.2 Summative Written Evaluation

Assessment	Content Covered	Format and Timing	Passing Score
Module Quizzes	One quiz for each of the 15 modules	Online; completed at the end of each module	80%
Chapter Tests	One test for each assigned textbook chapter	Online; completed at the end of each chapter	80%
Final Test	Comprehensive, all modules	In person; proctored at GAHCTC before completion	80%

Online quizzes and tests must be passed before the student advances to the next module. The in-person Final Test verifies that online learning has been retained and prepares the student for the proctored state competency exam.

5.3 Skills Competency Evaluation

Skills are evaluated using the Core Curriculum Required Skills Checklist. Students must perform each skill with 100% accuracy on all steps, including critical steps (hand hygiene, identification, privacy, safety, infection control, and communication). A student must be checked off on a skill in the lab before performing it on a resident in the clinical setting. A mock skills exam in Module 15 mirrors the state competency exam format.

5.4 Clinical Performance Evaluation

The clinical instructor evaluates each student daily using the Student Evaluation Form with progress notes. Criteria include:

- Safe, correct performance of checked-off skills
- Infection control and resident safety practices
- Respect for residents' rights, privacy, and dignity

- Accurate observation, reporting, and documentation (Clinical Observation & Reporting Checklist)
- Professional conduct: punctuality, active engagement, no cell phones at the clinical site, HIPAA compliance with no photographs of residents, and adherence to facility rules
- Communication with residents, staff, and the instructor

Clinical performance is rated Satisfactory or Unsatisfactory. Any unsafe practice or incident is discussed with the student and reported per program policy.

5.5 Remediation

A student scoring below 80% on an online quiz or chapter test reviews the module content, completes an assigned remediation activity, and retakes the assessment before the next module unlocks. A student scoring below 80% on the in-person Final Test completes a remediation plan with the instructor before retesting. A student unable to perform a skill at 100% receives additional coaching and open-lab practice before re-evaluation. Remediation is documented on the Student Evaluation Form; retest limits and dismissal criteria follow the GAHCTC Policy Booklet.

5.6 Completion Requirements

- All 98 approved hours completed: 40 online theory hours, 34 skills lab hours, and 24 clinical hours, including make-up of any missed in-person hours
- 80% or higher on every online module quiz and chapter test and on the in-person Final Test
- 100% on all required skills checkoffs
- Satisfactory clinical performance evaluation
- Compliance with program policies and clinical site requirements

Students who meet all requirements receive a Certificate of Completion and are eligible to register for the state competency exam. Student records are retained for three years.

5.7 Program Evaluation

GAHCTC evaluates the effectiveness of instruction and the program as a whole using:

- End-of-course student evaluations of instruction, materials, lab, and clinical site
- State competency exam first-attempt pass rates (written/oral and skills)
- Completion and attrition rates
- Clinical site and employer feedback
- Annual curriculum review against the textbook, federal/state requirements, and exam content outlines

Results are reviewed by the Program Director and used to revise content, methods, and assessments.

6. Alignment Matrix

The matrix links each program objective to the modules that teach it and the strategies used to evaluate it.

Objective	Modules	Evaluation Evidence
PO1	1, 15	Online quizzes & chapter tests; Final Test; professional behavior observation
PO2	2, 13	Role-play rubric; Online quizzes & chapter tests; clinical evaluation
PO3	3, 12	Hand hygiene & PPE check-offs; Online quizzes & chapter tests; clinical evaluation
PO4	4, 10	Emergency drill checklist; Online quizzes & chapter tests; skills check-offs
PO5	5, 9, 14	Scenario worksheet; Online quizzes & chapter tests; privacy steps in all check-offs
PO6	6	Case studies; Online quizzes & chapter tests
PO7	7, 8, 11	Vital signs check-offs; I&O worksheet; Final Test
PO8	9, 10, 11, 12	Skills check-offs (100%); mock skills exam; clinical evaluation
PO9	13	Video guide; role-play rubric; clinical evaluation
PO10	14	Case studies; Final Test
PO11	1, 2, 7, 15	Documentation exercise; Clinical Observation & Reporting Checklist
PO12	1, 15	Mock skills exam; résumé workshop; completion requirements
